## **Filosofia Theoretica Vol 5 No 1 (Journal of African Philosophy, Culture and Religions)**

To illustrate the first: retrograde motion [ 11 ] was a natural consequence of the Copernican core the claim that the earth and planets orbit the sun because observation of the planets was carried out on a moving observatory that periodically passed other planets-however it could only be accommodated by Ptolemaic astronomy by proposing and adjusting auxiliary hypotheses that supposed the planet to move on an epicycle retrograde motion did not follow naturally from the Ptolemaic core idea that the Sun, stars and planets orbit the earth. And even if they were not involved in a world-historical transcultural imperialistic process, they did not lack experience of cultural and political hegemony, since they were engaged in an internal colonization that would soon lead to the consolidation of nation-states.
