fact of fundamental importance regarding oxides is that if you  
could clean and smooth the surface in order to obtain a pure  
"metal surface ", what we would observe is the union of the  
two surfaces in contact In fact, in the absence of thin layers  
of contaminants, the atoms of the metal in question, are not  
able to distinguish one body from another, thus going to form  
a single body if put in contact. Minimum monthly payments are
